Shochu / /

Japanese Spirit, made from a wide variety of starches from sweet potato to barley, born of simple pot still technology imported from Korea and Taiwan some 700 years ago. Once thought of as drink for the coal miners and farmers of the southern Japan. In recent years this drink has become more popular than sake in Japan. Shochu is a reflection of the grain or starch it is made from and the koji, a mold that is responsible for the conversion of starch to sugar. We cannot have Shochu without this magical koji. Mellow than whiskey or vodka this spirit averages around 24 percent alcohol. Shochu is both funky and grainy at it's best and comes to life on the rocks with hearty grilled meats.
